GREYCAPS
LEADING A LEARNING REVOLUTION

This book strives to be completely authentic and accurate. The research for a volume such as this, takes several months and we have tried to ensure that the facts are updated. However, it is possible, at times, that something researched and compiled by us may have changed after the particular section of the book has been published. In such cases the updates and corrections would appear only in the next volume. Readers are requested to keep this in mind before using the information for any purpose.

Welcome to an all new series of quiz books from Greycaps, titled Get IT Right.

Interestingly, technology originates from the Greek word 'technologia', which referred to the use of utensils to make daily life simpler and more organised. Technology in the modern world is about IT enabled tools, gadgets and resources that help us manage our daily lives.

An insight into the world of technology, the people and companies that enable it and the trivia associated with it, will help us appreciate the domain better and make us feel comfortable as we interface with it.

This series features carefully crafted questions, making it an interesting read. We are sure you will enjoy reading this series as much as we have enjoyed compiling it.
